CT-260 PRO

The professional
systems solution for
control centres

plathosys®

CT-260 PRO

Intelligent USB handset solution with Push-To-Talk-/Push-To-Mute function

For secure communication in control centres

Control centres are busy places. It's loud in an open plan office with several people working side by side at their desks. Accurate information flow is critical. Concentration is needed at a workplace that is always dealing with emergencies. Swift action and decisions are essential as well as correctly passing on information received.

The best communication needs the best technology.

With the CT 260 PRO-Handset solutions from Plathosys we have developed professional products especially for operating in control

centres. They have successfully been used for many years both in national and international markets. However the new PRO version offers even more flexible and intelligent systems solutions for individual user requirements. The one employee can switch between handset and headset as necessary, while another colleague may prefer to use a connected loudspeaker to listen. The button on the handset can be individually programmed to either a Push-To-Talk or Push-To-Mute switch.

And much more is possible!

The well-designed and sturdy Plathosys CT 260 PRO with PTT/PTM-function

- Additional Plathosys handset to listen in
- Part No. 104213

External loudspeaker

- Sturdy synthetic casing
- Transmission range 250 Hz-8kHz
- 8 Ω options
- Part No. 103748

Desktop microphone
Plathosys CT 237

- Desktop microphone with or without LED-ring* & PTT-function
- Part No. 104171

Foot-operated switch

- Suitable as PTT/PTM switch
- Sturdy casing
- Part No. 102541

* Desktop microphone with LED-ring on request

HORST PLATZ

Your partner
for professional
communication

The Managing Directors Horst and Uwe Platz

Our knowledge – your solution

Developed in practice: Plathosys products

We provide solutions for your needs.

In more than 45 years we have proven to be a reliable and highly qualified partner in the field of telecommunications, information technology, automotive, aviation, engineering as well as for specialised traders and wholesalers. The latest products and solutions are complemented by the know-how of our sales team providing an optimal consulting and service capability giving us both national and international success.

It's not possible – is not an option for us.

As a medium-sized family business based in Friedrichsdorf near Frankfurt am Main we specialise in the development and implementation of special customised solutions. Pioneering products and flexibility are our hallmark. Ideas are developed in our technical department. We work closely with our partners and manufacturers to provide you with tailor-made concepts.

Developing tomorrow's communication.

With our own brand Plathosys we produce ITC product ranges in the field of USB Handsets with individual solutions developed from our own know-how over decades. Our handset solutions are well-suited for office- / UC applications and with Push-To-Talk and Push-To-Mute functions are already operational in control centres, in trading and in reception areas.
