plathosys®

CT-140   PRO

The easy to use
USB handset for the
office and on the move

plathosys®
CT-140 PRO

With this handset your PC becomes a highly effective telephone.

Plathosys CT 140 PRO
Your constant companion –
with a crystal clear sound even on the move

The USB handset Plathosys CT 140 PRO is the ideal version for all users who like to phone with a handset. Whether in the office or on the move, the handset appeals through its ease of use and can be used everywhere thanks to its straightforward installation via Plug & Play.

The wideband audio performance of the CT 140 PRO provides top voice quality and a natural sound when used with PC telephony. Thanks to the assistance of the standard Hearing-Aid-Compatibility (HAC), the CT 140 PRO allows those with hearing aids to use the latest communication technology in an age of Unified Communications.

Through the HID standard (Human Interface Device) the CT 140 PRO automatically links into every PC environment. Our development team will be pleased to provide support in customising your individual requirements and in integrating the Plathosys CT 140 PRO through API programming.
